Key Insights

- **Apple dominates sales:** iPhone 16 Pro and iPhone 16 together account for 64.5% of total revenue (\$8,992 out of \$13,934).
- **High-value products drive revenue:** Top 4 products (priced above \$500) generate 87.5% of total revenue.
- **Category 1 is the primary revenue driver:** Electronics category contributes 94.6% of total revenue.
- **Volume vs Value:** ARDUINO UNO and ESP32 DEV KIT have high unit sales (5 each) but low revenue contribution due to lower price points.
- **Sales peaked early August:** Highest daily revenue recorded on August 4th (\$3,597) driven by multiple iPhone 16 Pro orders.

Recommendations

- **Inventory Focus:** Prioritize stock levels for Apple products (iPhone 16 Pro, iPhone 16) as they drive majority of revenue.
- **Category Expansion:** Consider expanding Category 1 product offerings given its strong performance.
- **Bundle Strategy:** Create product bundles combining high-margin items (GPUs) with accessories to increase average order value.
- **Marketing Focus:** Concentrate marketing efforts on high-value electronics segment during peak periods.
